

## New Fingerprint Door Lock by Covetek Australasia.

Covetek, Australia's leading biometric specialist is pleased to announce the release of their latest technology stand-alone fingerprint door lock.

The BioDoor Lock (model L100) is the most user friendly and modern small profile fingerprint lock on the market today. Its compact size and attractive polished silver appearance, combined with the speed and reliability of the fingerprint or RFID Card access modes, makes this lock stand out from the rest. To top that off is an unbelievable price that means you can now get the ultimate in security and convenience plus exceptional value for money!

Besides its affordability, the main features include:

- Simple to install and operate.
- Up to 100 fingerprints and 100 RFID cards can be enrolled.
- Enrolments/Deletions have to be authorised by the Administrator.
- Master key for emergency access.
- Strong Zinc Alloy construction.
- Standard latch design – no mortise required.
- Handles can be set for left or right opening doors.
- Low battery level warning.
- 9 volt battery terminals for emergency power use.
- Passage mode for free entry.
- Modern, slimline design.

The L100 is receiving exceptional reviews from the building trade. Being a latch design, it is suitable for new apartments/houses, plus can be fitted onto existing doors with minimal work. RFID card access (125Khz) can be used with existing security cards, or for the household user, be used where fingerprints are not the best option – older persons, small children or trade contractors.

For peace of mind, Covetek Australasia, being the exclusive distributor of this product, provides full local warranty and support. Product certification standards include CE, FCC, RoHS, ISO 9001.
